### **January Farm Labor**

Missouri Highlights: The Cornbelt II region (Missouri and Iowa) had 27,000 workers on farms and ranches during the survey week of January 6-12, 2008. The workers hired estimate is up from 23,000 for the October 2007 survey week.

The average wage rate per hour for all hired workers was \$11.42 per hour, up 17 cents from the October 2007 average. Field workers were paid an average of \$11.38 per hour, livestock workers \$10.82 per hour, and combined field and livestock workers \$10.90 per hour.

<u>U.S. Highlights</u>: There were 778,000 hired workers on the Nation's farms and ranches during the week of January 6-12, 2008. Of these hired workers, 599,000 workers were hired directly by farm operators. Agricultural service employees on farms and ranches made up the remaining 179,000 workers.

Farm operators paid their hired workers an average wage of \$10.77 per hour during the January 2008 reference week. Field workers received an average of \$9.64 per hour, while livestock workers earned \$10.19 per hour. The field and livestock worker combined wage rate was \$9.87 per hour.

The number of hours worked averaged 38.4 hours for hired workers during the survey week.

Dry weather returned to southern California and the Southwest early in the week, followed by a shift of stormy conditions into

the Pacific Northwest. Mostly dry weather prevailed across the mid-section, except for light snow on the central Plains and a few showers and thunderstorms on the southeastern Plains. Muddy or snowy fields and feedlots caused livestock stress across the central Plains. Significant flooding developed across the central Corn Belt from Illinois to Indiana and southern Michigan, and a few rare tornadoes swept through parts of the Corn Belt. Heavy rain soaked areas from Missouri to Lake Michigan and eastward. In contrast, the upper Midwest was mostly dry. Rain provided Southeastern drought relief. although lake levels remained low. Winter grains and pastures benefited from the Southeastern showers, although Florida's peninsula stayed mostly dry. East of the Rockies, temperatures soared during the early to mid-week period. Weekly readings averaged at least 20 degrees above normal in parts of the Midwest, with several locations reporting record highs. Temperatures averaged at least 10 degrees above normal in the eastern half of the U.S., except for southern Florida. In contrast, colder than normal weather prevailed over much of the Intermountain West.

Due to Agency budget constraints, the January 2007 Farm Labor Survey was not conducted. Since the data in all Farm Labor Surveys are tied to a specific reference week, it was not possible to conduct this survey at a later time. Therefore, year-to-year comparisons are not available in this report.

#### Total Red Meat Production Sets All Time Record High in 2007

**Total red meat production** for the United States totaled 48.8 billion pounds in 2007, 2 percent higher than the previous year. Red meat includes beef, veal, pork, and lamb and mutton. Red meat production in commercial plants totaled 48.7 billion pounds. On-farm production totaled 135 million pounds.

**Beef production** totaled 26.5 billion pounds, up 1 percent from the previous year. Veal production totaled 146 million pounds, down 6 percent from last year. Pork production, at 22.0 billion pounds, was 4 percent above the previous year. Lamb and mutton production totaled 188 million pounds, down 1 percent from 2006.

Commercial cattle slaughter during 2007 totaled 34.3 million head, up 2 percent from 2006, with federal inspection comprising 98.4 percent of the total. The average live weight was 1,269 pounds, down 2 pounds from a year ago. Steers comprised 51.3 percent of the total federally inspected cattle slaughter, heifers 30.3 percent, dairy cows 7.4 percent, other cows 9.4 percent, and bulls 1.6 percent.

**Commercial calf slaughter** totaled 758,100 head, 7 percent higher than a year ago with 98.2 percent under federal inspection. The average live weight was 303 pounds, down 39 pounds from a year earlier.

**Commercial hog slaughter** totaled 109.2 million head, 4 percent higher than 2006 with 99.1 percent of the hogs slaughtered under federal inspection. The average live weight was unchanged from last year, at 269 pounds

**Commercial sheep and lamb slaughter**, at 2.69 million head, was down slightly from the previous year with 93.9 percent comprised by federal inspection. The average live weight was unchanged from 2006 at 136 pounds.

#### Missouri Annual Egg Production Down 3 Percent

Egg production in **Missouri** totaled 1.84 billion eggs during the year ending November 30, 2007, down 3 percent from a year ago. The number of layers averaged 6.96 million, down 3 percent from the 2006 average number of layers of 7.21 million. The annual rate of lay for 2007, at 265 eggs per layer was up slightly from 2006.

- **U.S. Average Number of Layers Down 1 Percent:** Layer numbers during 2007 averaged 344 million, down 1 percent from the year earlier. The annual average production per layer on hand in 2007 was 263 eggs, unchanged from 2006.
- **U.S. Egg Production Down 1 Percent:** Egg production during the year ending November 30, 2007 totaled 90.6 million eggs, down 1 percent from 2006. Table egg production, at 77.3 million eggs, was down 1 percent from the previous year. Hatching egg production, at 13.3 million eggs, was up 2 percent from 2006.
- **U.S. December 1 Inventory Numbers:** The total number of chickens on hand on December 1, 2007 (excluding commercial broilers) was 455 million birds, up slightly from last year.
- **U.S. Total Value:** The total value of all chickens on December 1, 2007 was \$1.34 billion, up 13 percent from December 1, 2006. The average value increased from \$2.61 per bird on December 1, 2006, to \$2.95 per bird on December 1, 2007.

<sup>2/</sup> Includes dry cows, excludes heifers not yet fresh.

<sup>3/</sup> Excludes milk sucked by calves.

<sup>2/</sup> Mid-month prices.

<sup>3/</sup> Beef cows and cull dairy cows sold for slaughter.

<sup>4/ &</sup>quot;Cows" and "Steers & Heifers" combined.

<sup>5/</sup> Missouri January fat test %: all milk 3.7

<sup>9,</sup> fluid grade 3.78, mfg grade 4.00.

U.S. February fat test %: all milk 3.77, fluid grade 3.76, mfg grade 4.07.

<sup>6/ &</sup>quot;All Hogs" divided by "Corn" prices.

<sup>\*</sup> Revised.

## **United States Honey Production Down 4 Percent**

Honey production in 2007 from producers with five or more colonies totaled 148 million pounds, down 4 percent from 2006. There were 2.44 million colonies producing honey in 2007, up 2 percent from 2006. Yield per colony averaged 60.8 pounds, down 6 percent from the 64.7 pounds in 2006. Colonies which produced honey in more than one State were counted in each State where the honey was produced. Therefore, yields per colony may be understated, but total production would not be impacted. Colonies were not included if honey was not harvested. Producer honey stocks were 52.5 million pounds on December 15, 2007, down 13 percent from a year earlier. Stocks held by producers exclude stocks held under the commodity loan program.

<sup>1</sup> For producers with 5 or more colonies. Colonies which produced honey in more than one State were counted in each State. 2/ Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the entire year. 3/ Stocks held by producers. 4/ Average price per pound based on expanded sales. 5/ Value of production is equal to production multiplied by average price per pound. 6/ Due to rounding, total colonies multiplied by total yield may not exactly equal production. 7/ Summation of States will not equal U.S. level value of production.
